Dedication

This study is dedicated to English speakers working to train Christian leaders in the Philippines who struggle as I did to gain fluency in a language so different from my own. It is my hope that something of what I have learned can help these people whose effectiveness depends so heavily on their ability to communicate clearly in a native Filipino tongue.
Acknowledgments

I have greatly appreciated the excellent suggestions of Bob Mugele, Don Burquest, Jerry Edmondson, and Mary Huttar. I am also grateful to Doug and Phyllis Trick, RBMU coworkers, who fanned my interest in pursuing linguistic research.

RBMU International, with whom I served in the Philippines, gave me permission to take a leave which resulted in this manuscript. My parents, Takashi and Jane Matsuda, have supported me in practical, generous ways.

I owe a special debt of thanks to Nenette Cada, my personal language and culture mentor, who patiently coached my stumbling Tagalog, answered endless questions, and shared my growing passion for hypothesizing rules to account for various phenomena. Were it not for her I am sure I would not be so motivated to be a good speaker and writer of Tagalog.

My husband, Bob, has helped me produce this manuscript in many ways. He thoughtfully took over chores when I was pressed for time, doggedly solved every computer problem I encountered, and drew all final diagrams meticulously.

Finally, I acknowledge my Heavenly Father, in whose perfect plan I have found myself called to work in the Philippines and thus to use every faculty available to communicate to Filipinos in their own tongue.

Table of Contents

DEDICATION .................................................. v
ACKNOWLEDGEMENTS ......................................... vi
ABBREVIATIONS ............................................... ix

1. THE TAGALOG SYLLABLE .................................. 1
   1.1 Introduction To CV Phonology ....................... 1
   1.2 Controversies Caused By Loanwords ................. 3
   1.3 The Tagalog Syllable And Auxiliary Templates .... 5
   1.4 Former Epenthesis Rule Eliminated .................. 9
   1.5 Vowel Syncope And Well-Formed Syllables .......... 11
   1.6 Predicting The Phonology Of Assimilated Loanwords 13
   1.7 Summary ............................................... 17

2. AUTOSEGMENTAL REDUPLICATION AND INFIXATION IN TAGALOG .... 19
   2.1 Introduction To Autosegmental Theory ............... 19
   2.2 Tagalog Verb Morphology ........................... 20
   2.3 Tagalog Replication Formulated Autosegmentally .... 26
   2.4 Infixation And Reduplication ....................... 31
   2.5 Agent Focus With Polysyllabic Prefixes ............. 44
   2.6 Other Ambiguities Resolved By Template Reduplication 54
   2.7 Summary ............................................... 61

3. TAGALOG STRESS ......................................... 63
   3.1 Primary Stress ........................................ 63
   3.2 Metrical Theory: Predicting Secondary Stress ........ 66
   3.3 Predicting Secondary Stress In Tagalog Verbs ....... 70
   3.4 Stress In Derived Nouns: Predictable But Not Autosegmental 81
   3.5 Adjectives ............................................ 83
   3.6 Secondary Stress Disambiguates Homophonous Words .... 87
   3.7 Tagalog Stress Patterns And Grid Theory .......... 89
3.8 Summary .................................................. 93

4. BALIGTAD TAGALOG: EVIDENCE FOR AUTOSEGMENTS 97
4.1 Baligtad Tagalog ......................................... 97
4.2 Infixed Baligtad Formulated Autosegmentally .... 100
4.3 Infixed As Autosegments ............................... 106
4.4 Autosegmental Stress: Inconclusive Evidence .... 108
4.5 Verifying Other Structures ............................. 109
4.6 Summary .................................................. 110

5. CONCLUSIONS AND PROBLEMS FOR FURTHER RESEARCH 113
5.1 CV Phonology ............................................ 113
5.2 Autosegmental Reduplication ......................... 114
5.3 Stress Via Metrical Grid Theory ...................... 116
5.4 Empirical Testing To Bring Us Back To Earth ... 117

APPENDIX A: TAGALOG PHONEMIC SEGMENTS .......... 119
APPENDIX B: CONSONANT CLUSTERS .................... 121
BIBLIOGRAPHY ............................................. 123
